SAINT-GOBAIN GLASS DESIGN

The future of habitat. Since 1665.

SGG DECORGLASS®

An exclusive range of patterned glass for vision control and decoration.

Description

SGG DECORGLASS is a range of patterned clear, body-tinted or wired glass. The translucent patterned glasses are produced by casting and rolling the glass between two cylinders, one of which is embossed with a pattern.

SAINT-GOBAIN has developed an exclusive product criterion:

SGG Vision Control Factor. It assigns each SGG DECORGLASS a factor of 1 to 10.

- Class 1 indicates maximum vision obstruction, i.e. an object is barely visible behind the glass.
- Class 10 indicates minimal vision obstruction with respect to the visibility of an object.

Applications

SGG DECORGLASS may be used for interior or exterior applications and is ideal for creating bright and private spaces.

It offers an extensive range of designs, colours and textures that are suitable for the decoration of residential, offices or commercial premises including:

- **Windows**
- **Doors**
- **Partitions**
- **Shower and bathscreens**
- **Furniture (office furniture, table tops, countertops, shelves)**
- **Internal and external crash barriers**
- **Street furniture**

Advantages

Light and privacy

SGG DECORGLASS separates areas whilst still providing maximum light and privacy, as well.

This helps to:

- Give the feeling of increased space in smaller living areas by diffusing and spreading light.
- Create a relaxed and intimate atmosphere by screening direct sight or vision.

Tradition and design

Various patterns are adapted to suit both classical and modern environments.
